NEXT AIRINGS OF WORLD OF RADIO 1239:

Thu 2000 on RFPI <http://www.rfpi.org> repeated 4-hourly [maybe]
Thu 2030 on WWCW 15825
Fri 0200 on ACBRadio Mainstream repeated 2-hourly [see below]
<http://www.acbradio.org/mainstream.html>
Fri 1600 on WBCQ after-hours <http://wbcq.com> repeated weekdaily
Fri 2300 on Studio X, Momigno, Italy 1584
Sat 0800 on WRN1 to Europe, Africa, Asia, Pacific
Sat 0855 on WNQM Nashville 1300
Sat 1030 on WWCW 5070
Sat 1830 on WPKN Bridgeport, 89.5, webcast <http://www.wpkn.org>
Sat 2000 on RFPI <http://www.rfpi.org> repeated 8-hourly
Sat 2030 on WWCW 12160
Sat 2030 on WBCQ 17495-CUSB
Sat 2030 on R. Lavalamp <http://www.radiolavalamp.org>
Sat 2300 on RFPI <http://www.rfpi.org> repeated 8-hourly
Sun 0230 on WWCW 5070
Sun 0300 on WBCQ 9330-CLSB
Sun 0630 on WWCW 3210
Sun 1000 on WRN1 to North America, webcast; also KSFC 91.9 Spokane WA,
and WDWN 89.1 Auburn NY; maybe KTRU 91.7 Houston TX, each
with webcasts
Sun 1100 on R. Lavalamp <http://www.radiolavalamp.org>
Sun 1500 on R. Lavalamp <http://www.radiolavalamp.org>
Sun 1900 on Studio X, Momigno, Italy 1584
Sun 2000 on RNI webcast, <http://www.11L-rni.com>
Mon 0100 on WBCQ 9330-CLSB
Mon 0230 on WRMI 7385 [NEW]
Mon 0330 on WSUI 910, webcast <http://wsui.uiowa.edu> [previous 1238]

Mon 0430 on WBCQ 7415, webcast <http://wbcq.us>
Mon 0900 on R. Lavalamp <http://www.radiolavalamp.org>
Mon 1600 on WBCQ after-hours <http://wbcq.com> repeated weekly
Wed 0930 on WWCN 9475

WORLD OF RADIO ON WRMI

From July 26, UT Mondays at 0230 on 7385, which will probably change to a new frequency by the following week. See USA below (gh)

WORLD OF RADIO ON ACB RADIO

Thanks to Chrissie, in the UK, who has a show on ACB Radio for inviting WORLD OF RADIO on that Internet station. From July 23, WOR will be appearing on the ACB Radio Mainstream at 0200 UT and repeated every two hours for the rest of UT Fridays.

The Mainstream has a two hour block of programmes which are changed every 24 hours, as opposed to the other streams which have a continuous programme format.

Home page of ACB Radio: <http://www.acbradio.org>

Mainstream page audio links: <http://www.acbradio.org/mainstream.html>

WM link: <http://www.acbradio.org/mainstream.wax>

WINAMP: <http://www.acbradio.org/mainstream.pls>

Real: <http://www.acbradio.org/mainstream.ram>

The other streams are the Treasure Trove (Old radio shows of the 1940s and 1950s and occasionally later ones), the Cafe, which features only blind and visually impaired musicians, and the Interactive stream which features DJs from all over the world.

Catch the Chrissie On Air weekly show on ACB Radio Interactive,

<http://www.interactive.acbradio.org> every Tuesday at 2100-2300 UT.
There is a detailed program schedule for the Interactive stream, but apparently not for Mainstream (gh)

Dear Glenn, This is great, I'll check out WOR to see how well it executes. If you plan to talk about this on WOR, you should point out that ACB radio is available to anyone, not just blind people. You might also like to investigate the ACB radio tuner. I think it is available on their web site. I don't know how to download it, someone did it for me, but the tuner allows you to switch among the four channels by simply doing alt-F4 to close one channel and then using the right or left arrow keys plus enter to go to another channel, very handy (Tim Hendel, AL, July 22, DX LISTENING DIGEST)

DXLD YAHOOGROUP: Why wait for DXLD? A lot more info, not all of it appearing in DXLD later, is posted at our new yg. Here's where to sign up. <http://groups.yahoo.com/group/dxld/>
(Glenn Hauser, May 13, DX LISTENING DIGEST)

** ALASKA. Seasonal schedule valid July 25, 2004 to August 29, 2004:

UTC	kHz	Language
0800	11765	English
0900	11765	Russian
1000	11765	Mandarin
1100	9795	Russian
1200	11765	Mandarin
1300	11870	English
1400	11870	Mandarin
1500	9615	Mandarin
1600	9615	Mandarin
1700	9615	Russian

(KNLS schedule at the web modified on 8. June 2004, via JKB, WWDXC via DXLD)

** AUSTRALIA [non?] 4750, 2154 unID and presumed mixing product from Christian Voice or RA on 9500 kHz, heard with talk in Indonesian but modulation sounded like a mixing product (Stu Forsyth, Steven Greenyer and Paul Ormandy braved the wintry weather (actually, the weather was pretty good for mid-Winter!) to spend two nights at Waianakarua, New Zealand, exact dates not given, but around Solstice, July NZ DX Times via DXLD) 4750 would be a semi-harmonic of 9500, not a mixing product; could it not be paralleled to 9500 to be sure? Or could it have been this??: (gh, DXLD)

4749.92, RRI-Makassar July 15, 1057-1110, 32332 Indonesian, ID at 1057. 1058 with IS. Local news (Kouji Hashimoto, JAPAN, Japan Premium via DXLD)

** BANGLADESH. Correction of High Frequency Broadcasting Schedule A04, Bangladesh Betar External Service: Presently 9550 and 15520 kHz are not in use (Ashik Eqbal Tokon - Rajshahi, Bangladesh, June 28, 2004, WWDXC via WORLD OF RADIO 1239, DXLD)

** BULGARIA. As in DXLD 4-082, New URL for Radio Bulgaria is now <http://www.bnr.bg> --- but missing an overall frequency list, now split to several separate language pages; each table is in the language of transmission, so if you can't speak the language, you don't understand the schedule. Wondering, why their new website won a prize (Dr. Juerger Kubiak, Ed., July WWDXC DX Magazine via Michael Bethge, DXLD)

** CONGO. 5785, 1938 29/6, RTV Congolaise fair in French with French singing followed by discussion by 2 OMs, ID 1946 followed by more music ñ KAB (Ken Baird, Christchurch, New Zealand, R5000, Palstar R30, 18m Wire, SW Eavesdropper, July NZ DX Times via DXLD)

Scenario: handwritten logging notes for 5985 were mis-read as 5785 by Ken, who also edits this log section, but it was placed before a 5800 entry. Or maybe RTVC actually punched up 5785 by mistake? Whenever there is an 'odd' frequency, editors need to point it out rather than reporting it without challenge, explanation or speculation (gh, DXLD)

** COSTA RICA. 13734.5, 13765.5, 13781, 13797, University Network, (spurs of 13750), 0104 July 22 (Tim Bucknall, Congleton, NW England, Icom R75 + Wellbrooke ala 1530, harmonics yg via DX LISTENING DIGEST)

** CUBA. R. Progreso, unknown site, 942.0 kHz (presume the 940 one off-frequency) GMT 0030+ July 20, vocals, M DJ, fair level and // 640 (Terry L Krueger, Clearwater, Florida, USA, 27.55.83 N, 82.46.08 W, DX LISTENING DIGEST)

** CUBA [non]. US PLANS TO USE C-130 MILITARY PLANE FOR RADIO, TV TRANSMISSIONS AGAINST CUBA --- For a strongly pro-Cuba view see <http://www.granma.cu/ingles/2004/julio/mier21/30violacion.html> No comment from me but its useful to read both sides of the arguments I guess (Mike Terry, UK, BDXC-UK via DXLD)

** FRANCE. Radio Orient is currently heard here in South Germany on 1350 with programming in Arabic and French, location is Nice, listed 300 kW. S4/04. This closes one of the most exiting [sic ñ I think he means exciting --- gh] DX channels. 73, (Günter Lorenz, Freising, Germany, July 20, MWC via WORLD OF RADIO 1239, DXLD)

It is strong (with deep fading) also in Milano, Italy. Sob, sigh (Giampiero Bernardini, Milano - Italia, ibid.)

On 1350, R. Orient is a fair signal. 73s (Steve Whitt, UK, ibid.)

French station Radio Orient heard on 1350 kHz this evening from tune-in after 2100 with news in Arabic, good steady signal here with little fading. News in Arabic continued until 2125 UT when the station identified in French as Radio Orient. The Arabic ID heard several times was "Idha'at al Sharq". Programming mostly in Arabic. The transmitter site is Nice - approved power is 2500 kW but I doubt very much if this output is used. So goodbye all the LPAMs and other DX on 1350 kHz. 73s (Dave Kenny, July 20, BDXC-UK via DXLD)

In questo momento, 2040 UT del 20 luglio 2004, i 1350 kHz sono devastati da una simpatica musica araba... Segnale non fortissimo, ma sufficiente a farci capire che abbiamo perso "il" canale dx. E' arrivata Radio Orient!!! DX addio!!! (Giampiero Bernardini, Milano, July 20, bclnews.it via DXLD)

Is the station 24/7??? 73's (Barry Davies, UK, MWC via WORLD OF RADIO 1239, DXLD)

ARABIC-LANGUAGE RADIO ORIENT OPENS ON MEDIUMWAVE/AM

Paris-based Radio Orient was observed by BBC Monitoring broadcasting in Arabic on the reactivated mediumwave AM frequency of 1350 kHz at 2100 gmt on 21 July.

Programming was in parallel with a satellite broadcast on Hotbird 13 degrees east frequency 12245 MHz and the live internet audio stream on <http://www.radioorient.com> The station also operates on FM in Annemasse, Bordeaux, Lyon and Paris.

The frequency was used for France Inter radio until 1 January 1997 but was reallocated to Radio Orient in March 2003 by the broadcast regulator, the Conseil Supérieur de l'Audiovisuel. This was part of an initiative to release AM frequencies to the commercial sector, relieving pressure on the overcrowded FM band and in anticipation of an intended replacement for amplitude modulation (AM), the Digital Radio Mondiale (DRM) system.

The transmission is believed to operate from a facility in Nice. The allocation reportedly permits a maximum power of 2,500 kW. However, observations on 21 July indicate that transmissions were not taking place at such high power or are directional in nature. Observations would be consistent with a range of sources, which detail the power as 300 kW in the direction of 220 to 230 degrees and 100 kW to 80-100 degrees, the Maghreb and Eastern Mediterranean respectively.

Source: BBC Monitoring research 21 Jul 04 (via DXLD)

** GABON. 9580, Africa No. 1, 2006-2021, July 20, French, Continuous French pop music with announcement by YL on the fives (2010, 2015, etc.), presumably regarding the strike at the station. The first two announcements each had a different "canned" ID, the 2020 announcement was without. Fair/good (Scott R. Barbour, Jr., Intervale, NH, R75, MLB-1, RS longwire with RBA balun, WORLD OF RADIO 1239, DX LISTENING DIGEST)

END OF STRIKE AT AFRICA NO. 1

The management and personnel of panafrican radio station Africa No. 1, based in Libreville, Gabon, have reached an agreement to end the strike that started on 15 July. Assistant General Manager of the station Michel Koumbagoye says that management have agreed to all the points raised by the strikers concerning the application of the new convention of the company. The trade unions and the management were due to sign a written document at the end of the afternoon yesterday in front of Gabonese Prime Minister Jean-François Ntoutoume Emane, and the strikers will return to work tomorrow (Friday) morning.

According to the management, the agreement envisages the installation as from August 1 of a new wage structure taking account of the career advancement and promotion of the personnel. Moreover, the agreement grants new contracts of employment to freelance journalists, and transforms into contracts of unspecified duration all the contracts with a duration of more than two years.

(Observer, Bulgaria, July 20 via DXLD)

** GERMANY. GERMAN MEDIA CLEANS STASI OUT OF ITS CLOSET

The long tentacles of East Germany's former State Secret Police, the Stasi, not only reached the Communist media, but infiltrated West German public broadcasters as well, a new study has found.

http://www.dw-world.de/english/0,3367,1432_A_1272098_1_A,00.html?mpb=en
(via Andy Sennitt, dxldyg via DXLD)

** GREECE. GREEK JOURNALISTS TO STRIKE FOR HIGHER PAY

ATHENS, Greece (AP) -- Greek journalists will strike for 48 hours starting Tuesday following the breakdown of talks for a collective wage agreement, unions announced Monday.

The strike is expected stop the publication of most national daily newspapers for two days as well as news programs on Greek television and radio stations. State-run television channels will also be off the air for three hours on Wednesday.

Journalist unions say employers deliberately wrecked negotiations to avoid paying salary hikes and accuse many owners of blatantly violating existing agreements, leaving workers unpaid, forced to work on part time contracts or paid well below agreed minimums (APws 07/12 1239 via Mike Cooper, DXLD)

** GUINEA. Re 7375: Hola Manuel, Correcta esta frecuencia? Guinea nunca antes en 7375. 73, (Glenn to Manuel)

Lo siento Glenn, creo que fue un error, me parece que es 7125 kHz, la frecuencia de Radio Guinea, pero ahora no tengo la radio aquí, para confirmártelo, ya que esa frecuencia la tengo memorizada en la radio. Un saludo desde España (Manuel Méndez, DX LISTENING DIGEST)

[Luego:] Rectificación_frecuencia_Radio_Guinea --- Hola Glenn, la frecuencia en la que escuché Radio Guinea es 7125 y por error puse 7375, que es la frecuencia de University Network, que la tenía anotada al lado de la de Guinea en mi libreta de escuchas. Disculpa por el error. Lamento que por mi culpa hayas publicado esa frecuencia errónea en tu boletín. Un abrazo desde España (Manuel Méndez, ibid.)

** HUNGARY. I listened to the R. Budapest file John Norfolk pointed out containing the July 18 ``And the Gatepost`` including the DX segment. It started at 14:45 into the 29:30 program and lasted until 27:17 when the multi-lingual IDs and IS started. Included schedules for R. Jordan in English, AWR Guam in English, WEWN in Spanish. Then logs (called ``DX Tips`` tho they were extremely routine) from Mikhail Karel(?) in Antwerp, ``Germany``, of CRI, NHK, VOA, Rossii, AIR, Israel, TRT, RA, in various languages when happened across, not necessarily the start of the broadcast. Then back to a schedule, for The Overcomer Ministry, which sounded incomplete. Then more ``DX Tips``, from James B. Tompkinson, Decatur IL: VOR, Taiwan, R. Prague International [sic], WRMI, Thessalonika [sic], Thailand, R. San Miguel, WBOH. The tips never include any program details, just station, time, frequency and language. Channel Africa English schedule for ``summer``; IRIB in English including 0030-0330 on 9905 [this is wrong! A mistake I made some months ago, corrected ASAP; the frequency is really in Spanish! Sources for the schedule info are NOT given, just like Budapest have always done, but now we know they are ripping off my material without credit!]; pronounced Sirjan site like ``Xian``! Libya in Arabic to Iraq via Issoudun, France: 16-1803 11660; 1803-1903 11660; USB 7425 11890; 1900-2030 11660. Editor and presenter was Sandor Laszko. I am not impressed (Glenn Hauser, OK, DX LISTENING DIGEST)

** IRAQ [non]. IRAQ: OM Michael Frese reports an "External service of Iraq" in Arabic now again around the clock. Transmission from facilities of Radio Bangladesh at 12050 kHz (MF, 7. July 2004)

Are you sure that this is an official governmental external service of the new Iraqi government? Or is it a clandestine transmission or only featuring program of the inauguration of the new Iraqi Government? Was their any station ID with a hint of transmitter location Bangladesh? Do you have any further information, like English announcements or translated Arabic announcements? Please give us further information and details! The frequency 12050 is listed by several up-to-date frequency lists in July 2004 at the Internet for Radio Cairo in Arabic

1100-0300 UT. This Radio Cairo schedule was also published by our magazine DXM: 12050, General Arabic programm (Juergen Kubiak, Ed., July WWDXC DX Magazine via Michael Bethge, DXLD) Nonsense

**** IRELAND. RTE SUSPENDS 567 KHZ FOR FOUR MONTHS FOR MAINTENANCE**

RT... Radio 1 has suspended broadcasting on its high power mediumwave transmitter at Tullamore on 567 kHz. RT... says the transmitter and the mast are thirty years old and badly in need of an overhaul. The shutdown will last for approximately four months. The low-powered mediumwave Cork transmitter on 729 kHz remains on air - making it the only authorised mediumwave transmitter presently on air in the Republic. More information on the RT... Web site.

Stay tuned - important changes from July - November 2004

<http://www.rte.ie/radio1/staytuned.html>

posted by Andy @ 10:04 UT July 20 (Media Network blog via DXLD)

Reminding us that they already activated LW 252 (gh, DXLD)

A window of opportunity for MW DX-ers to hear "what lies beneath"!
(Dave Kernick, England, 07.20.04 - 12:49 pm, ibid.)

From what I remember (from the old days when Tullamore was regularly shut down overnight) its should be Russia and Berlin fighting it out (Ray Woodward, UK, 07.20.04 - 1:13 pm, ibid.) RTE don't have the money to put another national network on, especially at MF (which virtually nobody uses anyway (remember the closure of 612) (Ray Woodward, UK, 07.21.04 - 7:52 am, ibid.)

Let's hope that it does come back and with some kind of alternative programming. Oldies or Nostalgia would suit me very nicely, thank you. (Eamonn, 07.20.04 - 10:58 pm, ibid.)

Bet they will not put it back on? By that time most of the audience will have found alternatives (Bob Pritchard, 07.20.04 - 7:07 pm, ibid.)

**** ISLE OF MAN. RADIO CAROLINE COULD BE REVIVED --- Sun 18th Jul 2004**

A proposed Ramsey-based long wave radio station could revive the name Radio Caroline. With less than a year before it goes on air, Paul Rusling, the Chief Executive of Isle of Man International Broadcasting, the company behind the project, says he is undecided of a name but hasn't ruled anything out --- audio of Paul Rusling interview at <http://www.manxradio.com/>

Apparently the name "Radio Caroline" was registered by their organisation some years ago (Mike Terry, dxldyg via WORLD OF RADIO 1239, DX LISTENING DIGEST)

** ISRAEL. IBA "ON VERGE OF FINANCIAL COLLAPSE" --- The newspaper Haaretz reports that the Israel Broadcasting Authority's financial reports for the years 2001 and 2002 reveal that the IBA is in imminent danger of financial collapse and may soon cease to be a "going concern."

Haaretz says an external report submitted two weeks ago by accounting firm Brightman Almagor found that the IBA accrued a deficit of NIS 200 million in those years. The figure directly contradicts reports IBA director general Yosef Barel submitted at the end of last year which showed a deficit of just NIS 35 million. Barel submitted financials prepared in-house by the IBA's own finance department.

** ITALY. Radio Studio X - Toscana --- Liebe H^rer, RMC Info hat auf der Frequenz 1584 khz k, rzlich mehrere Sender an der deutsch-franz^sischen Grenze in Betrieb genommen, was besonders Auswirkungen auf den Empfang unseres Programmes in S, d-West-Deutschland hat. Bitte kontrolliert doch heute abend zum deutschen Programm um 22:00 Uhr MESZ, wie das Signal bei Euch ist und teilt uns dies kurz per e-mail an diese Adresse mit: chris@radiostudiox.it Vielen Dank f, r Eure Mithilfe und Saluti dalla Toscana! (Chris Ise, Radio Studio X, Deutsches Programm, 1584 khz AM STEREO aus der Toskana, July 6, A-DX via DXLD)

** MALDIVES [non]. We've heard from Dave Hardingham, who is with Friends of Maldives, <http://www.friendsofmaldives.co.uk> about setting up an independent radio station for the Islands, where the current government does not allow a free press. Just people keen to initiate democracy and free speech in the Maldives. Based in London, they have Maldivians ready to produce programs, and as soon as shortwave transmission arrangements have been finalised, we'll let you know (Glenn Hauser, WORLD OF RADIO 1239, DX LISTENING DIGEST)

** MAURITANIA. 4845, at 0012, R Mauritania, Nouakchott, unbelievably still audible at midday local time! Poor-fair with interview in Arabic (Stu Forsyth, Steven Greenyer and Paul Ormandy braved the wintry weather (actually, the weather was pretty good for mid-Winter!) to spend two nights at Waianakarua, New Zealand, exact dates not given, but around Solstice, July NZ DX Times via WORLD OF RADIO 1239, DXLD)

** NETHERLANDS [non]. RADIO NETHERLANDS VIA WRMI AT 1200 UT

Due to cutbacks at client broadcaster Christian Media Network, Miami-

based shortwave broadcaster WRMI is, for the time being, carrying relays of World Radio Network at 1200-1600 seven days a week on 15725 kHz. This includes an hour of English from Radio Netherlands at 1200-1300. As this is not an official shortwave relay, the frequency is not announced by Radio Netherlands. But we welcome reception reports on this transmission to letters@rnw.nl

** OKLAHOMA. KOSU - On-line Listening REAL AUDIO STREAM CHANGES

KOSU has upgraded its Real Audio stream on the web to version 10. Web listeners currently using older players like the Real Audio 8 or RealOne will be prompted to download a small update to their player in order to receive the new higher quality format. Listeners who already have the Real 10 player will receive the stream without the update. A free Real 10 player is available by clicking on the icon on our Listen Live web page.

Those of you who have bookmarked our stream in your Real Audio player software will want to re-bookmark it in order to reach the new Real 10 stream. The old bookmark will work for a few more days (KOSU mailing list July 21 via DXLD)

** OKLAHOMA. ESTAMOS CREANDO UNA NUEVA RADIO PARA LA RAZA! Blares a quarter-page display ad in the July 10 issue of El Latino American [sic], a weekly free newspaper in OKC, but also reaching out editorially to Tulsa and Lawton, and somehow reaching Enid at some Mexican restaurants.

This is about 105.3 FM, ex-KSYY, which I have not actually listened to, revealing that the new slogan is ``LA INDOMABLE 105.3 FM''. More text from the ad:

``Tocando s lo la m sica que a ti te gusta [entonces, cl sica??? Creo que no]. En La Indomable 105.3 tu voz es la que manda y nos interesa tu opini n. Ll manos al 460-1053 y dinos que [sic] piensas, qu  canciones quieres oir, qu  promociones te gustan etc. --- Es my simple, tu opini n es lo m s importante y en La Indomable 105.3 FM ser  tomada en cuenta. T  te mereces una radio de calidad. Sigue en sinton a del 105.3 FM porque esto es s lo el comienzo.`` (via Glenn Hauser, Oclajoma, DXLD) Not indominable

** OKLAHOMA. One viewer can make a difference. Since my complaint to Nightline, affiliate KOCO-TV in OKC has hit the 0335:00 UT start of the program almost every night, and if not, only late by a few seconds rather than a couple minutes of extra commercials (Glenn Hauser, UT July 21, DX LISTENING DIGEST)

** OKLAHOMA. I did find OETA <http://www.oeta.onenet.net/> A writer says, "Why I won't contribute to OETA: "As long as the statewide public television system considers it more important to censor minority views, produces only one national show of music intended to please only an ultra-conservative audience, and can't even bother to fix audio and video synchronization for the duration of an entire half-hour popular show several times per year, I'll spend my money on other causes."

Enid must be an interesting (little?) town. I came across this movie and wondered if you had seen it. ``Enid Is Sleeping`` made in 1990 starring: Elizabeth Perkins, Judge Reinhold, Jeffrey Jones, Maureen Mueller, Rhea Perlman (Kaylee, enidalt yg via DXLD)

Har, har, a black comedy, not about Enid OK, but a woman named Enid. Not the first time we have had such confusion (gh, Enid, DXLD)

** PAPUA NEW GUINEA. 4960, at 1929 5 June, Catholic Radio Network, Vanimo good with music until opening at 2003 with chiming bells, ID in EE and prayers, fading quickly but noted with improved signal 6/6 BCM (Bryan Clark, Mangawhai, New Zealand, AOR 7030+, BOG antenna 125m NE, 110M East, July NZ DX Times via DXLD)

Gayle Van Horn and I are wondering if this one is actually on the air 24 hours, or as implied here, not, ``opening`` at 2003 UT (gh, WORLD OF RADIO 1239, DXLD)

4960, 1940 27/6, Catholic Radio Network strong but better as dawn appeared, inspirational music, Angelus recited at 2000 SMF (Stuart Forsyth, Waianakarua, New Zealand, AOR 7030, long wires, July NZ DX Times via WORLD OF RADIO 1239, DXLD)

4960, at 2000 Catholic Radio Network, Papua New Guinea, fair signal with ID, then chants, time pips and The Angelus. Not as strong or as steady as NBC 4890. At 2030 ran a program from the ``Bible Radio Network`` (Stu Forsyth, Steven Greenyer and Paul Ormandy braved the wintry weather (actually, the weather was pretty good for mid-Winter!) to spend two nights at Waianakarua, New Zealand, exact dates not given, but around Solstice, July NZ DX Times via WORLD OF RADIO 1239, DXLD)

** PARAGUAY. Radio Am rica --- Amigos da Lista, segue infoma o enviada pelo amigo Ad n Mur da R dio Am rica do Paraguai. Tentem as escutas e enviem informes ao Ad n pelo e-mail abaixo. 73 Samuel

Quero comentar que a ZP20 R dio Am rica est  no ar, as 24 horas do dia, nos 1480 KHZ, transmitendo desde a planta nova, em Villeta, com 5

kW de potência. Depois de muitas dificuldades, hemos tido bon successo em normalizar a situa  o.

Tamb m, os rapazes do Col gio T cnico Municipal Santa Rosa de Lima, -emby, est o provando, as 24 horas do d ia, nos 3220 kHz, faixa dos 90 metros. O sinal entra fortemente, e com boa qualidade, localmente. Com Um Forte Abra o do amigo! Ad n Mur (via Samuel C ssio, July 22, radioescutas via DXLD) New frequency; previously a hefty 5 watts (gh, DXLD)

** PERU. Amigos DXistas! The unID LA I had on 5062.35 kHz, also as unID by Rogildo F. Arag o in Bolivia, is a spur from Radio La Hora 4855.xx kHz. 5062 too weak this Tuesday morning to compare the two signals/programs but I listened to Radio La Hora: the DJs, jingle, etc. are the same. 73s (Bj rn Malm, Quito, Ecuador, July 20, WORLD OF RADIO 1239, DX LISTENING DIGEST)

** PERU. 4775, R. Tarma, 0245-0256*, July 20, Spanish, lite Spanish music, canned "Radio Tarma" ID at 0247, fanfare with full ID announcement by OM with "echo" vocal effects, choral-like music with more OM, organ music at sign-off. Poor/fair over static (Scott R. Barbour, Jr., Intervale, NH, R75, MLB-1, RS longwire with RBA balun, DX LISTENING DIGEST)

** SOUTH AFRICA. NEW BOSS OF SENTECH NAMED --- Wednesday's South African Cabinet meeting in Pretoria approved the appointment of the new chief operating officer of broadcast signal distributor Sentech. He is Abdul-Kader Mohamed, currently chief financial officer at the Development Bank of Southern Africa. Sentech operates all the broadcasting facilities in South Africa, including shortwave.

** SOUTH AMERICA. Jorge Garc a, from Radio Pira a Internacional tells us in Conexi n Digital List that his station is going to transmit today, Thursday 22 from 2200 UT until 1300 (following day) and on July 23 from 2200 UT to July 26!!!!!!! at 1300 with short cuts for battery changes. All transmission are on 6307 kHz. That's the last Radio Pira a Int's transmissions from South America in many years!!!!!! 73's & 55's (Arnaldo Slaen, Argentina, bclnews.it via DXLD) Viz.:

Jorge Garcia, desde Radio Pira a Internacional inform  en la Lista de Conexi n Digital que su emisora va a transmitir hoy, Jueves 22 de Julio, a partir de las 2200 UT a 1300 (del dia siguiente) y ma ana, Viernes 23 a partir de las 2200 hasta el pr ximo Lunes 26 de Julio, en forma ininterrumpida, s lo con breves cortes para cambio de bater as.

Todas las transmisiones se har n en la frecuencia de 6307 kHz. Como

nos indica el realizador de la emisora, se trata de las últimas transmisiones de Radio Piraña Internacional desde tierras sudamericanas ya que Jorge no sabe cuándo la emisora pirata volverá a irradiar sus programas desde este suelo!!!!!! 73's & 55's (Arnaldo Slaen, Argentina, July 22, Conexión Digital via DXLD) Viz.:

RPI transmisiones finales --- Estimados amigos! Esta tarde estaremos cambiando nuestro QTH ligeramente, es decir a una distancia de 300 metros del actual QTH. En el "nuevo" QTH que en realidad es el QTH "antiguo" de RPI (1999-2002) la antenna estará más elevada que actualmente y tendrá una altura de 18 m. en vez de 10m. como lo es ahora. El esquema de transmisión es la siguiente:

Miércoles (21 julio) - viernes (23 julio): 2200 UT a 1300(sig. día) con posibilidad de prolongación.

Viernes (23 julio) 2200 hasta lunes (26 julio) 1300 UT con servicio de 24h con pequeños cortes para cambio de baterías. Estos serán las últimas emisiones de Radio Piraña Int. en suelo sudamericano por varios años. No sabemos cuándo volveremos a emitir desde este suelo. Saludos de (Jorge R. García, Radio Piraña Internacional, July 21, Conexión Digital via DXLD) JRG makes some spelling errors, which makes me wonder if he is not a native speaker of Spanish (gh, DXLD)

** SUDAN. Just (21 July 2004) got info that the test transmissions of South Sudan station Voice of New Sudan on 9310 are delayed. Testing will start earliest next weekend (Jari Savolainen, Kuusankoski, Finland, WORLD OF RADIO 1239, DX LISTENING DIGEST)

** SWITZERLAND. My new website --- Hello Glenn. I trust you are well.

It's been two years since I retired from SRI, which for all intents and purpose is now defunct as a radio entity. I enjoyed two years of "la dolce fa niente", but started to miss the excitement of radio journalism. For that reason, I got the inspiration to launch a new website. I took up the challenge and will be going online on August 1 with "Switzerland in Sound".

Basically, SIS is everything I used to enjoy doing at SRI, but without the constraints of a specific format and a boss over me. It's Bob Zanotti Unplugged, so to speak.

SIS is a multimedia entity, which will include text, photos and, above all, audio - and lots of it. I call it "radio on demand". Rubrics include Timely Topics, Travel Tips, Places to See-Things to Do, and Features. As a special attraction and in recognition of the past, Bob Thomann and I recently got together to record a one-hour dialogue, looking back on our 24 years as "The Two Bobs", which is included in

SIS.

I would be grateful if you would spread the word among your audience.
The URL is: <http://www.switzerlandinsound.com> (as of August 1)
Many thanks and 73, (Bob Zanotti, July 20, WORLD OF RADIO 1239, DX
LISTENING DIGEST)

** SWITZERLAND. SWANSONG FOR VOICE OF SWITZERLAND | Excerpt from
report by Swiss Radio International's Swissinfo web site on 21 July

Swiss Radio International is to cease all radio broadcasts at the end
of October, and will thereafter concentrate exclusively on its
Internet platform, www.swissinfo.org.

Starting 1 August, a special series of radio programmes will look back
at key events that have shaped SRI and Switzerland over the past seven
decades.

SRI ended its news and current programmes in April, but broadcasts are
continuing on shortwave and satellite until the end of October.
[Passage omitted giving details of where to find schedule and
frequency information on web site].

During our last 12 weeks on air, we will be broadcasting a special
half-hour programme each week to recall highlights since SRI first hit
the airwaves in 1935.

In the week starting 1 August, listeners can hear how SRI evolved from
the Swiss shortwave service - which went on air for the first time on
1 August 1935 - into swissinfo, which went online in 1999.

Assignment Switzerland

Other programmes in the "Assignment Switzerland" series will profile
personalities who shaped the country, the four Swiss cultures and the
Swiss living abroad.

We'll also be looking back at key events in politics, science and
technology and the arts, and finding out what outsiders think of
Switzerland.

The final programme in the series will look at how Swiss views of
their own country have changed over the past half-century.

We do hope you will tune in to remember SRI's nearly 70 years on air.
You can also listen to the programmes online each week by clicking on
"In Focus" in our multimedia section. Source: Swissinfo web site,
Bern, in English 1330 gmt 21 Jul 04 (via BBCM via WORLD OF RADIO 1239,

DXLD)

Same story, with sidebars, link to pdf schedule, which I assume does not specifically say these shows are on SW, since English has been cancelled already:

** TURKS & CAICOS. 530, Radiovisi n Cristiana --- Heard them today. I live just south of Daytona Beach and I get a .025-.050mv signal on them all day, at night 1-3mv. Despite what has been mentioned in print they are still running 50 kW, not 100 kW. They are using a 1987 vintage Nautel transmitter that was shipped back to Canada to have the frequency changed to 530 from 1570, having been used by the Atlantic Beacon previous. The Beacon directional array was taken down and a new quarter wave was erected for RVC. The tower sits about 200 ft from the ocean (Jerry Kiefer, Port Orange, FL/Puerto Plata, Dominican Republic, July 18, NRC-AM via DXLD)

I wonder what kind of directional pattern they had for 1570. I have an ID from John Bowker's collection of 1570 Atlantic Beacon. The former owner of 1570 then WHOG Fernandina Beach, FL coincidentally initiated 30 watt night service around the time the 1570 Turks and Caicos station came on. This got WHOG out of being just a daytimer and wham, 1570 Atlantic Beacon barrels into Fernandina like it was a local. Mark Hogan was very disappointed (Ron Gitschier, Palm Coast, FL, ibid.)

Atlantic Beacon/1570 info: two tower array, cardioid pattern, looked like a kidney bean with a tight null at about 65 degrees. Towers had 90 degree spacing; they were 5/8 wave Pirod towers, 260 feet steel and 112 feet top loading. Towards Jacksonville, 320+/- degrees it had just over 3300 mv at 1 km (Jerry Kiefer, Port Orange, FL/Puerto Plata, Dominican Republic, July 18, NRC-AM via DXLD)

Actually, as I have reported here many times before, I have a QSL letter from the RVC engineer stating that they run the 50 kW Nautel powered down to about 40 kW. Electricity is extremely expensive there since it is all generated with imported fossil fuels. The low frequency and the ocean front tower make them sound much bigger (Patrick Griffith, N NNK, Westminster, CO, ibid.)

Just listened to them minutes ago 12 am Eastern, weak here in Florida, barely nudge the S meter on a Panasonic 2900. They've got to be running low power. 570 & 600 out of Cuba are hot tonight (Jerry Kiefer, Port Orange, FL, July 18, NRC-AM via DXLD)

** U K. Richard Sambrook is to leave his job as the BBC's head of news to take up a new post as director of the corporation's World Service

it has been announced. Mr Sambrook has been the BBC's news chief for four years and was at the centre of the row with the Government over the Dr. David Kelly Affair. He will be replaced as director of BBC news by Helen Boaden, currently controller of Radio 4 and BBC7 (ITV teletext, July 22nd via Mike Barraclough, dxldyg via DXLD)

BBC'S HEAD OF NEWS MOVES TO NEW JOB

LONDON (AP) -- The British Broadcasting Corp., whose reporting standards were criticized by a judicial inquiry, said Thursday that its head of news is moving to a new position within the corporation.

Richard Sambrook will become director of the BBC's World Service and Global News Division responsible for developing the BBC's overall global news strategy across radio, TV and new media, the corporation said. He will be succeeded by Helen Boaden, currently controller of Radio 4 and the digital TV channel, BBC7.

Sambrook was head of news last year when the BBC ran a report accusing the government of "sexing up" a vital intelligence dossier used by Prime Minister Tony Blair as a basis for Britain's involvement in the war in Iraq.

An inquiry by Lord Hutton into the suicide of weapons adviser David Kelly, identified as the BBC's main source for the story, absolved Blair and officials of "sexing up" the dossier.

But Hutton faulted BBC editors for failing to review what reporter Andrew Gilligan was going to say before he went on the air with his story and for failure to first get government reaction.

In an e-mail to BBC staff after Hutton's report, Sambrook conceded then that "the BBC made mistakes and we have to face up to that." Sambrook and Boaden take up their new appointments in September.

"After nearly four years as director of BBC news, Richard Sambrook will provide fresh leadership of the BBC's global news role, which has been given high prominence in the BBC's manifesto 'Building Public Value,'" said Mark Byford, the corporation's deputy director general and head of BBC journalism.

Sambrook and Boaden will both be members of the BBC's new Journalism Board, which reports to Byford. Sambrook said Thursday that he was "delighted to have the opportunity to lead the BBC's international news services at such a crucial time for audiences around the world." (APws 07/22 0744 via Mike Cooper, DXLD)

NEW LEADERS FOR BBC'S UK AND GLOBAL NEWS OPERATIONS

The BBC today announced important executive changes in the leadership of its UK and international news operations. Richard Sambrook is to become Director of the BBC's World Service & Global News division, responsible for developing the BBC's overall global news strategy across radio, TV and new media.

He will be succeeded as Director of BBC News by Helen Boaden, currently Controller of Radio 4 and BBC 7. Helen will be responsible for all UK-wide news and current affairs across radio, television and new media and for all BBC News staff, including Newsgathering.

Richard and Helen will take up their new appointments in September. They will both be members of the BBC's new Journalism Board, reporting to Deputy Director-General Mark Byford, together with Pat Loughrey, Director Nations & Regions, and Stephen Whittle, Controller of Editorial Policy.

The BBC's Director-General Mark Thompson said today: "Richard and Helen are the right people to lead these two vital parts of the BBC's journalism in the future as we continue to strengthen and develop our output both in the UK and around the world."

Mark Byford, Deputy DG and head of all the BBC's journalism, said: "After nearly four years as Director of BBC News Richard Sambrook will provide fresh leadership of the BBC's global news role, which has been given high prominence in the BBC's manifesto Building Public Value. Helen Boaden has been a superb controller of Radio 4. Her strong leadership, experience and insight make her the outstanding person to lead BBC News in the future."

Richard Sambrook said: "I've devoted my professional life to BBC journalism so I'm delighted to have the opportunity to lead the BBC's international news services at such a crucial time for audiences around the world. To take the great strengths and heritage of the World Service and build on them across radio, TV and new media will be an enormous challenge and a great privilege."

Helen Boaden said: "BBC journalism has a unique place in the lives of our audience. It's a privilege to be asked to lead the team who will ensure that BBC News remains robust, original, independent and fair. I love Radio 4 and have had a truly wonderful time there but this is a huge and exciting new challenge which I shall relish."

The BBC also confirmed the appointment of Nigel Chapman as Director of the World Service, reporting to Richard Sambrook on all World Service activities. Nigel has been Acting Director, World Service since February. Anne Barnard, Chief Operating Officer for BBC World, and

Sian Kevill, Editorial Director BBC World, will also report directly to Richard.

** UNITED KINGDOM. BBC ANNOUNCES REFORMS IN DEALING WITH COMPLAINTS |
Text of BBC press release on 19 July

An emphasis on greater transparency, objectivity and accountability underpins radical reforms in the way the BBC will deal with complaints, announced today.

New streamlined procedures will make it easier for the public to make a complaint and obtain, where appropriate, a speedy correction.

There will be two routes to make a complaint and a straightforward two stage appeals process.

A new Code of Practice will ensure that the public know the standards to expect when they complain.

A new online site - <http://bbc.co.uk/complaints> - is to be established, informing the public on complaints received and action taken, and to publish corrections.

The Board of Governors is to strengthen its oversight of the process by appointing a new Head of Complaints (Governance), reporting directly to the governors, who will monitor the effectiveness of the complaints processes.

Announcing the reforms, Mark Thompson, BBC director-general said: "The reforms we are announcing today mark a different attitude from the BBC towards complaints.

"We want to begin with the presumption that the licence payer is right, not wrong.

"There will be a greater willingness at the BBC to admit mistakes and where appropriate put things right."

BBC Chairman Michael Grade said: "The reforms announced today are part of a programme of change to improve the BBC's accountability to licence payers.

"The changes mean greater objectivity, fairness and transparency when the BBC receives a complaint.

"The governors will review these new arrangements from time to time to

ensure they meet expectations."

The announcement follows a three-month review of complaints handling, led by deputy director-general Mark Byford.

The review has taken into account recommendations made by the Neil Report, published last month.

The new streamlined procedures will ensure that:

There will be two simple routes for complaints to be sent to the BBC - either direct to BBC Information, or, if complainants prefer, to the relevant programme;

The BBC aims to respond to all complaints at the first point of contact within 10 working days;

A new Code of Practice, published today at bbc.co.uk/complaints, and improved publicity about complaints will ensure people know what to expect when they complain;

If complainants on editorial matters remain dissatisfied after two exchanges of correspondence, they may appeal to the Editorial Complaints Unit (ECU) (formerly the Programme Complaints Unit) for independent investigation;

and if still dissatisfied the complainant will be invited to make a final appeal to the Governors' Programme Complaints Committee (GPCC);

A programme or output area or BBC Information must offer referral to the Editorial Complaints Unit if after two exchanges the complaint is unresolved.

Very serious editorial complaints will be "red flagged" to ensure they are fast-tracked.

The decision to "red-flag" a complaint will depend on the nature of the complaint and not on the importance of the person making it.

The decision of the Editorial Complaints Unit will be binding on programme-making or output departments;

The BBC online presence at bbc.co.uk/complaints will be used to provide proper reporting to the public on complaints received and action taken.

A new Complaints Management Board, chaired by the deputy director-general, will oversee complaints handling by BBC management and ensure

best practice and that learning from complaints is shared at a senior level.

More effective reporting through a new central logging system within BBC Information will ensure that the Complaints Board is fully informed.

A new Head of Complaints (Governance) will be appointed, reporting directly to the BBC Governors, who will monitor the delivery of all aspects of complaints handling at the BBC and report regularly to the governors on the effectiveness of BBC processes.

The Governors' Programme Complaints Committee (GPCC) remains the final appeal body. As now the GPCC will be advised independently of management on editorial appeals.

The Executive Board of the BBC and BBC Governors will separately consider complaints handling on a quarterly basis, with a full assessment in the Governors' Annual Report.

Simon Milner, the BBC Secretary, will lead the overall implementation of the new arrangements.

Implementation of all the recommendations will start in the autumn, alongside the new changes to governance announced in the recent BBC document Building Public Value. Source: BBC press release, London, in English 19 Jul 04 (via BBCM via DXLD)

Here's a complaint: The BBC suffers from superlativitis --- apparently feeling classical music is incapable of speaking for itself, the commentary accompanying the Proms (in the latest instance) as usual overdoes it. R. Strauss' Alpine Symphony is judged to be ``mighty``, a superlative heard all too often in BBC classical announcing. Give it a rest! Let ME decide for myself whether it is ``mighty`` or just maybe unneedful of any such description. Or publish a list of which works are mighty and which are not (Glenn Hauser, OK, DX LISTENING DIGEST)

** U S A. WAR OF WORDS OVER VOA PETITION, EXTERNAL US STATIONS | Text of editorial analysis by Alistair Coleman of BBC Monitoring Media Services on 15 July 2004

A war of words has broken out between staff and directors at Voice of America as hundreds of VOA staff signed a petition after becoming concerned about the station's future, according to American press reports.

The Washington Post on 14 July reported that the petition, directed to the United States Congress and entitled "Who's killing America's

Voice?", had been signed by nearly 500 staff members concerned that the Broadcasting Board of Governors - the body which oversees US taxpayer-funded broadcast outlets - is dismantling the radio service "piece-by-piece" while launching services with "no editorial accountability".

Staff accuse the BBG of channelling funds into new stations such as Arabic-language Radio Sawa and Al-Hurra television "which are not subject to the same journalistic standards and monitoring as VOA", while closing VOA's Arabic service, reducing English-language and European services, and adding greater emphasis to music at the expense of news, according to USA Today.

Non-VOA stations meet with mixed success

Chief amongst the staff's concerns are the formation of Radio Sawa, Radio Farda and Al-Hurra Television. Sawa is aimed at a younger audience and mixes Western pop music with brief news bulletins and comment, described as "55 minutes of pop and five minutes of wire stories" by an unnamed VOA journalist in the Washington Times. The station, whose name translates as "Together" is the most listened to international radio station in Iraq according to a November 2003 survey. It has been praised as a success in the battle to win over Arab hearts and minds, despite suggestions that listeners do not listen to the station for its news content. Radio Farda, a joint VOA/Radio Free Europe venture, is the equivalent Persian-language station aimed at young Iranians.

Al-Hurra ("The Free One"), a commercial-free Arabic-language satellite TV channel for the Middle East devoted primarily to news and information, is operated by a non-profit corporation called the Middle East Television Network, with a first-year budget of 62m US dollars awarded by Congress.

Recent surveys by the Brookings Institution show that Al-Hurra has failed to make an impression on the viewing habits of Arab speakers, with not one of 3,300 people surveyed picking the station as a primary source for news, and only 3.8 per cent choosing it as a secondary choice, raising suggestions that by misunderstanding its audience, Al-Hurra's budget might be better spent on other projects.

BBG chairman defends new stations

VOA staff are also angered by the reassignment of VOA news director Andre deNesnera to be the station's diplomatic correspondent, seeing it as a "demotion" and evidence of management efforts to undermine VOA's objectivity in news reporting, a move which drew criticism from press watchdogs such as the International Press Institute. With new

stations operating outside the structure of Voice of America, staff are concerned that they are being sidelined as the BBG "attempts to dismantle the nation's radio beacon".

Complaints that both Sawa and Al-Hurra have not reported major news stories in a timely manner, including the capture of Saddam Husayn, were refuted by BBG chairman Kenneth Tomlinson in a letter to the Washington-based political publication The Hill on 14 July.

Dismissing the petition, Tomlinson said: "It is difficult to take seriously any document that makes such an erroneous charge", pointing to the fact that Sawa's listeners heard of the arrest "as soon as listeners to any other media outlet". Accusing the VOA petitioners of "distorting the facts", he points to the 1994 Broadcasting Act which ensures all BBG-supervised stations operate "to the highest possible standards of broadcast journalism". The BBG was committed to bringing "balanced, objective media as a pillar of modern liberal democracy to a worldwide audience", said Tomlinson, with Sawa, Farda and the newly launched VOA service to Pakistan, Aap ki Dunya, increasing their news output.

Speaking to the Washington Post, Tomlinson explained that newer services were created independently of Voice of America to avoid red tape. "We launched Al-Hurra in a matter of months. If we tried to do it inside VOA, it would have taken years."

Citing the end of the Cold War and a renewed focus on the Arab world, Tomlinson told the Post that "the war on terror is a prime requirement." Given a choice between VOA's traditional audience in Eastern Europe and the Middle East, "you unfortunately have to go with the countries in the Middle East".

** U S A. BBG AWARDS CONTRACT FOR ADVISORY AND ASSISTANCE SERVICES

The US Broadcasting Board of Governors (BBG) says it has decided to award a contract on a non-competitive basis for the provision of specialized and timely non-personal expert, advisory and assistance services, including analytical and research services as they may be required, to support the BBG in the performance of its entire worldwide multimedia broadcasting public diplomacy mission. This includes "the use and development of programming on medium wave, FM, and shortwave broadcasting to attract substantial target audiences, as determined by the BBG."

Because of the specialized nature (i.e., technical, business, cultural, logistical, and political considerations) and the necessary

timeliness of the contractor's performance, the BBG says it intends to non-competitively award a negotiated firm-fixed-price contract to Bert Kleinman Programming, Inc. (BKP) of Arlington, VA for this specialized work on the basis of BKP's unique technical, business, and other qualifications and recent pertinent experience in radio, television, and multimedia news, information, and music programming for mass audiences.

BKP has the known capability to successfully meet the BBG's overall time schedule for its multimedia programming efforts, and BKP has comprehensive international broadcasting qualifications and experience. The term of this proposed contract is for one base-year, with a single one-year option, subject to annual funding availability.

The BBG says BKP is the only responsible source it knows that has demonstrated in-depth specialized business and technical knowledge, and multimedia experience with mass audience programming that is critical to the contractor's ability to perform the above-summarized work in a high quality and timely manner for the BBG. However, other organizations that believe they fulfill the criteria are welcome to make this known to the BBG.

** U S A. EX-SOVIET CITIZEN DEFENDS VOA NAME

7-19 From the Hamilton (Ohio) Journal News By Benjamin Poston

WEST CHESTER TOWNSHIP -- Igor Zdorov, 57, of Maineville, is a former Soviet refugee from the wrong side of the infamous Iron Curtain.

He was born in Siberia in 1946 and raised in Moscow. As a young boy, Zdorov said he remembers watching ruler Josef Stalin in parades and thinking how lucky he was to have been born in a great and prosperous nation.

Not until he heard broadcasts from the Voice of America as a 13-year-old seeking answers did Zdorov come to his political awakening. One day, his father caught Zdorov listening with rapt attention to the radio.

"He firmly told me to turn the radio off and added that 'everything they say is a lie,'" Zdorov said. "I kept secretly listening and it took me no time to figure out that at least 'not everything they said was a lie.'"

The Voice of America's reporting, in a few short years, led the young Soviet to realize how suppressive communism was, and that the real liar was Radio Moscow.

"I wanted to know what was really going on in the world. Besides being the source of truth, the VOA became my major learning tool," he said.

While he said he holds the deepest respect and admiration for the late President Ronald Reagan and his politics, Zdorov said he does not want Butler County to rename the VOA complex.

"What I'm trying to do is to explain to people how important the Voice of America was and still is. I think the legacy of the VOA is something else and it should be preserved," he said.

Butler County Commissioner Michael Fox has suggested naming the entire VOA complex -- which also includes the 200-acre Butler County MetroParks Freedom Voice Reserve -- after Reagan. Fox suggested the amended name could be the Ronald Reagan Memorial Freedom Voice Reserve or the Ronald Reagan Memorial Voice of America Park.

"I think Reagan was a hero to the (Soviets). I don't think (Zdorov's) opinion represents everybody's over there," Fox said. "President Reagan is famous for laying the foundation for the collapse of the Soviet Union."

Zdorov recently spoke to a group of VOA Museum volunteers in West Chester Township -- and saw the Bethany station he listened to during the 1960s.

"This brought tears to my eyes. A thought that some day I would see the station I was listening to never crossed my mind," he said.

In 1981, in the midst of the Cold War after Reagan had taken office, Zdorov defected from the Soviet Union to Minneapolis, Minn., with his wife and two children.

"I am very happy to live in the most democratic society in the world. This would have never happened to me without the VOA telling the truth. And who knows how many others were set straight by the VOA. I am sure it has made a very significant contribution into the ending of the cold war," he said.

Greg Amend, president of the MetroParks Board, said an informal caucus of his members last month showed that they would support an amendment to the Freedom's Voice Reserve name.

The VOA has two active transmitting stations in Greenville, N.C., and Delano, Calif., as well as numerous relay stations across the country [sic - should be world]. (via Kim Elliott, DXLD) After what Reagan did to the VOA??!!

**** U S A. AGENCY FORCED TO POST SETTLEMENT AGREEMENT**

Dateline: Washington, 07/20/04. In yet another case in which in the Agency demonstrated its inability or unwillingness to follow Labor law, the Agency will have to post a settlement agreement. The case involved the Agency's failure to provide information that was requested by the Union in the GS-13 TV Techs overtime grievance. The Agency is required to send this notice to all employees via email within 30 days after approval of the settlement agreement (AFGE Local 1812 at VOA, via DXLD)

**** U S A. WHAT'S HAPPENING WITH THE CANTONESE SERVICE?**

<http://www.wbng.org/rfa/bulletins/2004/070204.html>

Despite repeated assurances by RFA management that it wants to keep the Cantonese service, members are wondering if that's true.

At bargaining on June 28th RFA's managers said the main obstacle to filling two vacant broadcaster positions was visa problems. They assured us RFA did not intend to shift positions out of Guild jurisdiction by filling them in Hong Kong. (RFA's chief bargainer in an email later denied that RFA gave such an assurance, but all four Guild bargainers heard it).

The next day, RFA told the Cantonese service that one of the Broadcaster positions would be filled by a stringer in Hong Kong and that a Hong Kong contractor would become the acting Director of the service (Radio Free Asia Guild Unit via WORLD OF RADIO 1239, DXLD)

**** U S A. IRAQ/USA: SURVEY OF US-FUNDED AL-HURRA TV'S AUDIENCE | Text of press release from US government-funded satellite TV broadcaster Al-Hurra dated 19 July 2004 and distributed via PRNewswire**

Springfield, Virginia, 19 July: A new survey of Iraq conducted by Oxford Research International shows that 61 per cent of Iraqi adults had watched the new US-funded Arabic language TV channel Al-Hurra (Arabic for "The Free One") in the previous week. Since it launched on 14 February 2004, Al-Hurra has quickly established itself as an important resource for Iraqis to get their news - 19 per cent of those surveyed cited Al-Hurra as one of their top three sources of information. Of those people who watch Al-Hurra, 64 per cent found the news to be "very" or "somewhat" reliable. The results are based on face-to-face interviews with adults (over the age of 15) in Iraq between 19 May and 14 June 2004, four months after Al-Hurra first aired.

Al-Hurra is the latest and most technologically advanced television

organization to enter the crowded Middle East satellite television market. The satellite channel is a 24-hour news and information network broadcast entirely in Arabic. It can be seen in 22 countries throughout the region via Arabsat and Nilesat, the same satellite systems used by all major Arabic channels.

In April 2004, a second channel was added called Al-Hurra Iraq specifically for Iraqi audiences. The new channel was available by satellite during the time of the survey. It has subsequently started broadcasting with a clear signal in Baghdad on Channel 12 and in Basra on Channel 3. Additional terrestrial channels are expected in the near future. Along with in-depth news from Al-Hurra, Al-Hurra Iraq provides nightly newscasts and talk shows specifically dealing with the issues facing contemporary Iraq.

"We always knew that it was critical that we reach out to Iraq. As the country begins rebuilding its government, it's important to provide the citizens with objective, accurate and balanced reporting of the news within their country and around the world," stated Norman J. Pattiz, Chairman of the Broadcasting Board of Governors' Middle East Committee. "Even though we had early indications of Al-Hurra's success, the fact that 61 per cent of Iraqis are watching the network after being on the air for several months is extremely encouraging. There was never a question that people would watch Al-Hurra, but no one could have predicted this many, this quickly."

The Oxford survey covered all of Iraq with a total sample of 2,912 adults. Oxford Research International provides a unique research facility in the transition economies of Central and Eastern Europe, the CIS, Central Asia, China, South-East Asia, the Middle East and Africa. The firm was founded in 1995 by a group of analysts who received their training at the doctoral level at the University of Oxford.

An earlier telephone survey of satellite television viewers in major cities of the Middle East conducted in April by the French research firm Ipsos-Stat showed that a range of 18 per cent to 44 per cent of adults (15+) who live in houses with telephone and satellite dishes in seven Middle Eastern countries had watched Al-Hurra in the previous week. The surveys were conducted in Lebanon (Beirut), Syria (Damascus and Aleppo), United Arab Emirates (Abu Dhabi and Dubai), Egypt (Cairo and Alexandria), Kuwait (Kuwait City), Jordan (Amman, Irbid and Zarka) and Saudi Arabia (Riyadh and Jiddah) in early April. Past week viewing in Lebanon was 40 per cent; Syria 29 per cent; UAE 19 per cent; Egypt 18 per cent; Kuwait 44 per cent; Jordan 37 per cent and Saudi Arabia 19 per cent.

Of those who said they had watched Al-Hurra, 53 per cent of Al-Hurra

viewers consider its news "very" or "somewhat" reliable. Reliability figures were 70 per cent for Saudi Arabia; 54 per cent for Lebanon; 40 per cent for Egypt; 44 per cent for Jordan; 61 per cent for Kuwait; 65 per cent for UAE and 37 per cent for Syria.

Al-Hurra and Al-Hurra Iraq are operated by a non-profit corporation called "The Middle East Television Network, Inc" (MTN). MTN is financed by the American people through the US Congress. MTN receives this funding through the Broadcasting Board of Governors (BBG), an independent federal agency that oversees all US international broadcasting. The BBG serves as a firewall to protect the professional independence and integrity of the broadcasters.

** U S A [non]. AFRTS SATELLITE CONTRACT AWARDED TO T-SYSTEMS

The American Defense Information Technology Contracting Organization (DITCO) and headquarters of the American Forces Radio and Television Service (AFRTS) has awarded a new contract to T-Systems for TV and radio program distribution via satellite. Specialists from the company's media and broadcasting division will set up and operate earth-based satellite stations in Mannheim, Germany, and Vicenza, Italy for broadcasting AFRTS programs.

Furthermore, the new contract now provides for using two transponders - instead of one - on the Hot Bird satellite system. This enables AFRTS to distribute up to 16 TV and 30 radio services all over Europe and in the Middle East as far as Kuwait. For 10 years now, T-Systems has been serving more than about 200,000 American military households or individual military members outside the USA direct via satellite for AFRTS. [no SW, I guess, but would be opportune -- gh]

** U S A. 5080, 0800 8 July, R Marti in Spanish with US and Spanish announcers talking about politics in USA and Europe // 5130, 5980, 6030 ñ JSB (John Standingbear, Prescott Valley, Arizona, USA, DX 375 and whip, July NZ DX Times via DXLD) On a DX 375 and many other low-end receivers, you will get receiver-produced images, 900 kHz below the true frequency. I'm amazed that experienced DX listeners and editors still don't realise this. 5080 is an image of 5980 and 5130 is an image of 6030 (gh, DXLD)

6027.4, 0858 26/6, R Marti good with transmission details at s/off ñ SMF 26/6 (SMF Stuart Forsyth, Waianakarua, AOR 7030, long wires, July NZ DX Times via DXLD) Very strange: would not expect an AOR 7030 to be

off that much, nor would expect R. Marti to be, unless they were trying to sidestep a jammer. I am not aware that they have ever used this tactic. Or is this another instance of side-tuning and reporting the readout instead of the true carrier frequency? (Glenn Hauser, DX LISTENING DIGEST)

** U S A [non]. The noise Jeff hears on 7555 seems identical to the type of noise being observed on 7385 and it has been sending in this mode for about 12 months. Previous to that, the mode sounded to be a facsimile type of transmission [like 'galloping horses']. I am assuming that it is the same transmitter.

I believe this one is located somewhere in Europe and is audible on frequency whenever I tune across it, day and night. As remarked previously, I am no utility expert, but did note some time back a listing of a station in France as received by the British monitoring station at Baldock on this frequency, and which might have referred to this one. Broadcasters seem to be aware of it and have so far steered clear of the frequency - except maybe KJES (Noel Green, UK, July 20, DX LISTENING DIGEST)

** U S A. WRMI will start broadcasting WORLD OF RADIO from July 26, UT Mondays at 0230 on 7385. By the following week, WRMI will probably have a new frequency below 7 MHz, to escape the interference on 7385 if it continues. Jeff White says the DX program schedule for the moment is:

UT Sunday

0230 Viva Miami or Voice of the NASB
0300 DX Party Line

UT Monday

0230 World of Radio
0300 Wavescan
(Glenn Hauser, July 22, DX LISTENING DIGEST)

** U S A. media bytes: tuesday, july 20, 2004 ... Updated: | 06:07| a.m. | pt | --- Air America Radio is expected to announce -- jointly - - with a major radio chain a new package deal that includes San Diego. AAR host Randi Rhodes started to hint that San Diego will be a new home of the network during her broadcast last week, and meanwhile -- work has begun to transform a heritage station. The move is being dictated by corporate offices and the announcement is slated to be either late this week or early next. Station officials have denied the move, while station ad executives are telling advertisers that new programming is slated. Air America Radio is optimistic that that the new "coast-to-coast" deal will begin to give the punch they need to be heard on AM and FM stations in all corners of the U.S. Stay Tuned.

(SDRadio.net July 20 via DXLD)

** U S A. "RADIO FREE SILVER" PULLED OFF THE AIR BY STATION OWNER
http://www.thedailypress.com/artman/publish/printer_1263.shtml
By Jim Owen Jul 20, 2004, 18:39

"Radio Free Silver" a one-hour, daily, liberal talk show in Silver City [New Mexico] is off the air.

KNFT Radio owner Matt Runnels announced Monday he was canceling "RFS" because 20 to 25 of the station's advertisers threatened to pull their spots from all KNFT programming if the show continued to be aired. Runnels said he was faced with a loss of nearly \$10,000 in monthly advertising revenue.

Car dealers, bankers, pizza business owners, all-terrain vehicle sellers and furniture-store owners were among those who threatened to pull their ads, according to Runnels.

"It's a shame that, in America, we can't have someone with an opposing view," he said. "It wasn't like ('RFS' was) preaching anarchy. ... If you don't like what you hear, push the button. There's a lot of programming out there.

"I do a lot of conservative programming," Runnels continued. "We have (talk shows hosted by) Rush Limbaugh, Michael Savage and Bill O'Reilly."

Runnels said some advertisers objected to the liberal show's criticism of President Bush. "Rush Limbaugh still badgers and belittles and degrades President Clinton, and he hasn't been in office for four years," Runnels noted. "I thought, as a balance, we could put ('RFS') in a slot," he said.

"But, after a month or six weeks, I started hearing rumblings." Some customers didn't want their advertisements aired on "RFS." They "told us (an official) with the Cattle Growers (Association) came by and said it was an un-American show," Runnels reported.

Business owners said the association official told them the cattle growers would boycott KNFT advertisers if the show was not canceled, according to Runnels.

Ty Bays, southwest area vice president of the New Mexico Cattle Growers Association and a former president of the Grant County Area Cattle Growers Association, denied that either organization threatened a boycott.

"If (association members) want to support area businesses that advertise on that station, that's up to them," Bays told the Daily Press. "We have not made any official statement. We're not officially banning that radio station. Our members listen to country music; when they hear ('RFS'), they probably turn it off."

The president of the Grant County Area Cattle Growers Association, Jason Dobrinski, was not available for comment this morning.

Because of customer complaints, KNFT stopped placing any advertising on "RFS," instead requiring the program to pay for itself by collecting about \$600 a month from supporters. The fund-raising goal was met, and the program became self-sustaining, according to Runnels. He said "a lot of people" contributed, with checks ranging from \$1 to \$100.

However, KNFT advertisers continued "calling our sales people," threatening to cancel their ads because of "RFS," Runnels said.

** U S A. We see in PublicRadioFan.com listings that there is a new webcasting station from New Mexico, KSFR 90.7 in Santa Fe. It's relatively low-powered and not on Sandia Crest, so doesn't make it into Albuquerque, except in certain sweet spots, but has built up steadily in the last few years into a good local public radio station which can concern itself with Santa Fe, not Albuquerque. Check out their program schedule at <http://www.ksfr.org> Some intriguing titles, and a good variety of music shows in the evening; the ones I have picked out to enter in my Monitoring Reminders Calendar, and to check out when possible, beginning with weekday drivetime magazines with lots of local content, here strictly UT days and times:

M-F 1400-1500 Santa Fe Radio Café

M-F 2200-2400 The Journey Home

Tue 0030-0100 Living Juicy

Tue 0300-0600 Beyond Borders

Wed 0130-0400 Tuesday Night at the Opera

Wed 0400-0600 Map Is Not Territory

Thu 0100-0200 You Heard It Here First --- new music

Thu 0400-0600 Last Hours of the Night

Fri 0200-0400 Acoustic Explorations

Fri 1830-1900 Center Stage --- arts in SF

Sat 0100-0200 Soundtrax

Sat 0200-0300 Best of Broadway

Sat 0300-0400 Southwest Stages

Sat 0400-0600 Santa Fe Opry

Sat 1430-1500 Boom Box Classroom

Sat 1800-1830 New Mexico This Week
Sun 1300-1400 Ancient Airs
Sun 1800-1830 New Mexico This Week
Sun 1900-2000 Living on the Edge -- Toward a Sustainable New Mexico

Unfortunately the WM stream keeps hanging up on us, but we get it to go sometimes. Hope they get the bugs out of this soon.

Especially entertaining was Last Hours of the Night. Also see host's website <http://www.publicradiogod.com>

Only a few of NM's public radio stations webcast: KUNM in Albuquerque (which also covers Santa Fe, but Albuquerque comes first), KRWG in Las Cruces, KSJE in Farmington, another recent addition KEDU-LP in Ruidoso, and now KSFR, most welcome from the closest cultural oasis to Enid, The City Different, where the minimum wage has been raised to \$8.50 since the Bush regime won't do so, and neither will Kerry, the cost of living being so expensive there that even that barely keeps the average worker out of poverty. Some other NM stations we wish would webcast: KRZA Taos-Alamosa, KENW Portales, KANW Albuquerque, not to mention some of the exotic Res stations. At least KSUT does so from SW Colorado, also reaching into NW NM (Glenn Hauser, OK, DX LISTENING DIGEST)

** U S A. An advance tidbit from the Issue 29 AM Switch column. . .

1170 WWVA WV Wheeling - The mention of a proposed move to Stow, Ohio by this station (see Auction 84 items DX News, Issue 24) has conspicuously disappeared from the FCC database, having been dismissed by the feds. Let's hope this is the last we hear of this outrageous proposal. Don't forget where you saw it first, hi. 73, (BILL Hale, July 20, NRC-AM via WORLD OF RADIO 1239, DXLD)

I heard on the 1440 WAJR (Morgantown, WV) News at noon today that Clear Channel was going to hold a press conference at 1400 today to announce that due to pressure from the listening public and WV members of Congress they have decided not to move the transmitter. Nothing else since (Larry N4SEA Fravel, Shinnston, WV, July 20, *ibid.*)

From the time this was proposed, I was wondering what would happen if Senator Robert Byrd ever got wind of it. Now I wonder if that's what happened. 73 (Bill Dvorak, Madison WI, *ibid.*)

I saw Byrd interviewed on Meet the Press with Russert this past Sunday. He seemed to be showing signs of Parkinson's disease, with hand tremors etc. I have no doubt he would be highly protective of such a well-known state asset. But I'd have to wonder how much time he has left (Bob Foxworth, FL, *ibid.*)

Also about WWVA, registration required:

** U S A. STEALING ALL TRANSMISSIONS

http://www.metropulse.com/dir_zine/dir_2004/1430/t_eye.html

Knoxville's pirate radio station was the victim of a burglary last Monday afternoon, when two men broke into Knoxville's First Amendment Radio's trailer in South Knoxville, stealing two CD players, a turntable, computer, headphones, TV monitor and a few other items.

The theft didn't shut KFAR 90.9 FM down; the most important equipment --- the mixing board and transmitter --- were bolted down. But it did leave the volunteer-run station scrambling to replace what was lost.

``We have equipment burn out from overuse a lot, so every few months we're replacing something. Most of the equipment that was stolen we'd bought in the past year,`` says one KFAR deejay, who goes by the alias The Ghost. ``We definitely did not have the funds to purchase new equipment.``

The Ghost said he couldn't estimate how much all the equipment cost. Some speculate that the thieves might have gotten the idea to raid the station after reading the July 4 News Sentinel article that focused on KFAR.

The station has stepped up security, replacing the locks and putting out a new security camera. ``One good thing about [the theft] is it kind of prepared us for if the FCC came and took our equipment, how fast can we get stuff to get back on the air,`` he says.

If you'd like to help out, a list of needed equipment will soon be up on the station's website, <http://www.kfar.org> or you can call the station at 577-7955. Keep an eye out for some upcoming benefits in the Old City (via Artie Bigley, DXLD)

** U S A. PIRATE STATIONS UNDER ATTACK --- Radio, TV and law enforcement officials gathered in Hollywood on Tuesday to talk about ways to sink radio pirates. BY JONATHAN ABEL, Miami Herald
http://www.miami.com/mld/miamiherald/news/local/states/florida/counties/broward_county/9202447.htm?1c

The disc jockeys on one Fort Lauderdale hip-hop radio station routinely use the words ``f--k`` and ``b---h`` along with other obscenities. They encourage underage drinking, and can block key emergency communications.

Even the advertising pushes the envelope. A DJ on 89.1 FM, for example, made this pitch for a local liquor store on Friday night: 'If you're 18 with ID, you can get anything you want, if you know what I mean.' The station did not return more than a dozen phone calls to The Herald over the past two days.

More than 50 radio managers and owners gathered Tuesday at a meeting of the Florida Sheriffs Association at the Westin Diplomat Resort & Spa in Hollywood. Their goal: To plot strategy on taking small-time, illegal operators off the air.

South Florida is the capital of pirate radio stations -- those that are not licensed by the Federal Communications Commission, according to Matt Leibowitz, general counsel for the Florida Association of Broadcasters.

And because those stations are not licensed, they do not adhere to FCC regulations. 'It's a Catch-22,' Leibowitz said. 'If you're not licensed, you're not subject to the same standards of decency.'

But now, thanks to a new law against unlicensed radio transmission that took effect July 1, the crime has been elevated from a misdemeanor to a felony.

Under the new state law, those convicted of radio piracy -- now a third-degree felony -- face up to five years in prison and a fine of up to \$5,000.

Previously, radio piracy was outside of local law enforcement's jurisdiction because it was a federal misdemeanor. That meant it was rarely, if ever, enforced, Leibowitz said.

OBSCENITY ABOUNDS

The medium is dangerous and the message is obscene, law enforcement officers say. Yet pirate radio is at the center of a flourishing counter-culture in South Florida, where around 35 underground stations operate.

'Because there's such a low cost involved in setting up a pirate radio station, someone can go to Radio Shack, buy some inexpensive radio equipment and literally communicate gang messages on different frequencies that gang members driving in a car or listening at home can hear,' said state Rep. David Rivera (R-Miami), who sponsored the new law.

The Broward Sheriff's Office has one of the most advanced -- and

aggressive -- anti-pirating programs in Florida, experts say. Even before the new law went into effect, BSO shut down a dozen stations over the past 18 months, said Capt. Larry DeFuria.

'We found out through basic police work that people who violate federal laws generally violated other laws,' DeFuria said.

TOUGH ENFORCEMENT

For example, radio pirates often did not have proper proof of ownership for their equipment, weren't operating out of a properly zoned building, or their electrical equipment was not up to code, and BSO could take the equipment. 'It takes ruthless, local law enforcement tactics,' DeFuria said.

The general area of interference, according to BSO, is south of Sunrise Boulevard in the Fort Lauderdale area.

But it's not just the obscene message that rankles pirate radio's critics; it's also the medium which, they say, poses a danger by blocking legitimate radio transmissions.

'They could frustrate an Amber Alert or interfere in a weather emergency,' said Reggie Garcia, an attorney for FAB.

When more than one station broadcasts over the same signal, there is an overlap in which the pirate station can be heard over a legitimate one, experts say.

Radio executives say that is not fair. 'We had pirates on both sides of the dial,' said Jerry Carr, president and CEO of WXEL, who has been involved in lobbying for this new legislation. 'They put us out of business in some areas.'

Garcia also pointed out that pirate stations have tampered with air traffic control signals. 'There is a chance that people could die because of it,' said Roy Pressman, a broadcast consultant (via Artie Bigley, DXLD)

** U S A. FLORIDA (PIRATE), 1620, Radio Keenam, Orlando; 0045+ 20 July; tune-in to French (almost RFO-ish sound) talk, but later definitely Kreyol talk (preaching?). Fading in between WTAW and the Virgin Islands. Probably the Orlando pirate, but the Homestead Kreyol also a possibility (Terry Krueger, Clearwater, FL, DX LISTENING DIGEST)

** U S A. NEWS FLASH, THE CLUE TRAIN FOR TV NEWS --- 17 July 2004

I broke down and got a copy of the book. It's by Bonnie Anderson,
formerly of CNN, NBC, The Miami Herald and Cocco, now Florida Today.
The only thing I found in the entire book that needs clarification is
Matt Lauer's journalistic quals. Matt came out of the same primordial
soup that Robin Young did, PM Magazine, at WJAR TV in Providence RI.
In that format you learned how to due an interview or you were gone.

She won't be on the O'Reilly factor anytime soon, however. The chapter on Fox is worth the price of the book alone. The bad and ugly chapters are priceless.

Paul Harris interviewed her on his talk show in St Louis a couple of weeks back and here's the audio; it's in real [two segments].
<http://www.harrisonline.com/audio/listings/bonnieanderson.htm>

This book is the "clue train" for TV news. Go read it. Before one of the suits at CNN gets lucky and slaps a restraining order on the publisher (they have tried). (Music choices for the book: Who Loves You ---Four Seasons) and Moonlight Feels Right ---Starbuck). (Lou Josephs blog July 17 via DXLD) Viz.:

Bonnie Anderson [7/7/04]: The veteran TV newswoman talks with Paul about her book, "News Flash," in which she says that TV news is no longer about journalism and the truth, and it's not about a liberal or conservative bias -- the only bias in TV news is towards the bottom line. She discusses the hiring practices, the lack of ethics, and the lack of delineation between news and entertainment. Bonnie also explains why she withheld information while covering the Waco siege, and how a top CNN executive was wrong to suppress information about atrocities in Iraq and Cuba just to maintain the network's relationship with their governments. This is the book the network news divisions don't want you to read! [see site for two audio linx]

[Amazon.com] Bonnie Anderson's book is "News Flash: Journalism, Infotainment, and the Bottom-Line Business of Broadcast News" (via DXLD)

** VENEZUELA [non]. Radio Nacional de Venezuela, a través de sus programas en onda corta [°vía Cuba!], est· anunciando que ha efectuado algunos cambios en sus transmisiones, y da como v·lidos y actualizados los siguientes:

Zona de San Francisco	1100-1200 H. Local, 1800-1900 UTC	13740 KHz
Zona del Caribe	1500-1600 H. Local, 1900-2000 UTC	9550 KHz
Zona de W·shington	1605-1705 H. Local, 2005-2105 UTC	6000 KHz
Zona de Chicago	1705-1805 H. Local, 2205-2305 UTC	9820 KHz
Zona de Chile	1700-1800 H. Local, 2100-2200 UTC	11875 KHz
Zona de Buenos Aires	1700-1800 H. Local, 2000-2100 UTC	15230 KHz
Zona de R�o de Janeiro	1700-1800 H. Local, 2000-2100 UTC	17705 KHz

Agradece que se reporten estas transmisiones a la siguiente direcci n de correo electr nico: wwwondacorta@hotmail.com [sic] o al Apartado de Correos 3979, Caracas, Venezuela [sic: see previous reports that this is out of service, replaced by a complicated street address] (Manuel M endez, Lugo, Spain, July 19, DX LISTENING DIGEST)

No he escuchado los anuncios, pero en realidad no hubo cambio en la emisi n para ``San Francisco`` (no importa el resto del pa s?). El 20 de julio la encuentro como siempre a las 19 TU, y no a las 18. La emisora se queda mas confusa que nunca. Del horario citado parecen haber cambiado la cantidad de horas entre TU y hora local para la figura correcta en este caso, 7 horas en verano -- pero cambiaron la hora citada en TU en vez de la hora local! A las 19 TU, en San Francisco son las 12 del mediod a, y no las 11 de la ma ana. Aunque escribo antes de pasar m s horas de la tarde, pienso que las otras emisiones (excepto para Sud-Am rica), se encuentren como siempre una hora m s tarde en TU que citadas arriba.

Hay que recordar que todas estas emisiones emanan desde Cuba y no desde Venezuela, aunque la emisora no lo admite. Si Ch vez caiga del poder en el referendo del 15 de agosto, sin duda La Habana termine este acuerdo... 73, (Glenn Hauser, DX LISTENING DIGEST)

[Luego:] en 9550, RNV todav a a las 20 y no a las 19 TU, es decir a las 16 y no a las 15, hora de verano de Cuba, y horas normales en PR y RD, los principales pa ses caribe os hispanoparlantes; a las 2030 no puedo confirmar 15230, y como siempre 17705 est  lleno de Grecia v a Delano. 6000 inaudible a las 2105 tanto como las 2005. Hasta cierre a las 2201, algo in 11875, no confirmado RNV. En la hora de las 22, nada en 9820. Hubo portadora por las 2250 en 11760, y comenzando a las 23, se al de intervalo de RNV, p sima calidad de sonido, emisi n perdida arriba, pero en el esquema anterior para Am rica Central a las ``1700`` y todav a nada en 9820 (Glenn Hauser, OK, DX LISTENING DIGEST)

** VIRGIN ISLANDS U S. 1620, Radio Mart  (via WDHP-EB), Frederikstad; GMT 0045-0300 tune-out 18 July; the weekend Mart  relay clearly here - - fading in with baseball coverage, Mart  jingles, // 6030. Overall fairly good signal (Terry Krueger & David Crawford at Krueger's QTH-Clearwater FL, DX LISTENING DIGEST) What's ``-EB``? Extended band?

** ZAMBIA. In response to my query, N. Pakula of ZNBC replied the following. ``We are planning to put our signals (radio and TV) on satellite. We are also planning to re design our QSL card. We want it in colour`` (Swopan Chakroborty, India, DX LISTENING DIGEST) This item had no country header, but I can only assume it refers to Zambia (gh)

SANGEAN PT-80

Just got PT-80, works good. Someone has done their homework on this one. Are there any SW clubs in or around KC MO. SW man for 60 years, love old radio. HI"""""" (Larry Margrave, DX LISTENING DIGEST) NTMK

PROPAGATION  
+++++

MW & LW TA's

Glenn: I was lucky here in N.J. to log FM DX from Canada and Arkansas-to-Florida during the July 5 to 7 openings that you already mentioned, but also.... There have been Trans-Atlantic Long Wave African stations on 153, 207 and 252 kHz at 0430 UT July 13 and 0430 UT on July 19. All with various North African music.

Many Medium Wave stations also heard between 531 and 1602 kHz, so I counted split-frequency signals with my BFO set for a 400 Hertz tone.

14 splits around 0430 UT 7/13

29 splits from 0240-0300 7/14

35 splits between 0225-0245 7/15

56 splits between 0415 & 0500 7/17

8 splits around 0140 7/19

Most were too weak to show audio; the best signal came from Spain-1359, S7 at 0419 7/17 with music & man speaking Spanish.

Some MW stations not quite dead on the 9 kHz splits were 890.927 or 890.981 (different nights), 963.956, 1034.986, 1071.061, 1295.99v, and 1583.994 kHz (Wells Perkins - way west of the Statue of Liberty in New Jersey, DX LISTENING DIGEST)

The geomagnetic field ranged from quiet to major storm levels. The first two days of the summary period were dominated by quiet to active geomagnetic conditions due to the influence of the coronal hole high speed stream. Activity levels decayed to generally quiet to unsettled conditions with isolated active periods. The onset of the transient on 16 July resulted in active to major storm levels early on 17 July. Thereafter, through the end of the summary period, the field was quiet to unsettled.

FORECAST OF SOLAR AND GEOMAGNETIC ACTIVITY 21 JULY - 16 AUGUST 2004

Solar activity is expected to range from low to high. Regions 649 and 652 are both expected to produce further M and X-class activity early in the period. Old Region 646 is due to return on 29 July and could produce isolated M-class flare activity through 12 August.

A greater than 10 MeV proton event is possible.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to reach high levels on 26 ñ 27 July due to a recurrent coronal hole high speed stream.

The geomagnetic field is expected to range from quiet to active levels with minor storm periods at high latitudes. Unsettled to active conditions with high latitude minor storm periods are possible on 25-26 July as a recurrent coronal high speed stream rotates into a geoeffective position. At the time of this writing, a CME associated with an M8 flare in Region 652 appears to be at least partially Earth directed; consequently, minor to major storm levels are possible on 23 July. Region 652 is a very large and complex sunspot group with good potential for geoeffective CMEs during the first week the forecast period.

(<http://www.sec.noaa.gov/radio> via WORLD OF RADIO 1239, DXLD)

#### AURORAL CONDITIONS

Look out for aurora and auroral conditions of the next few days as today at 1230 UTC an M8 Class solar flare erupted from Sunspot 652 which had just come into view (Mark Coady, Ont., July 20, ODXA via WORLD OF RADIO 1239, DXLD)

Alle 1229 UTC le onde corte si sono improvvisamente svuotate!!!

Dopo avere inviato l'allerta ho riacceso il ricevitore e la situazione È tornata normale. CiÚ È avvenuto nel giro di circa mezz'ora, perÚ posso assicurare che nonostante la brevità il fenomeno non È stato determinato da eventuali difetti tecnici della mia stazione in quanto la banda di 13m era ancora attiva e sui 49m il livello del noise elettrico locale era regolare ma le broadcasting erano sparite tutte. Possibile un black out cosÍ breve? (Luca Botto Fiora, Italy, July 20, bclnews.it via WORLD OF RADIO 1239, DXLD)

As often happens following a blackout, the MUF shot up the next day: July 21 around 1410, 13m was hopping from the Middle East, with Dubai 21605 heard well for the first time in a long time, among others. Look at the SF = 170, highest for a long time (Glenn Hauser, OK, WORLD OF RADIO 1239, DX LISTENING DIGEST) ###
